_____----------------

Professional Summary

Results-driven professional with around 5 years of diverse experience in software development. Strong background in full-stack development with expertise in various programming languages and frameworks. Excels in troubleshooting complex issues, implementing best practices, and driving innovation to improve overall system reliability. Looking to bring a unique blend of development expertise to a dynamic team, fostering efficiency and delivering high-quality solutions.

Professional Experience

3Ack, FullStack Engineer, Oslo, Norway(January 2023 - Present)
- Leading the development of high-performance software application from scratch using MongoDB for backend logic, TypeScript for type-safe scripting, and reacting for dynamic frontend development.
- Designed the responsiveness of pages using media queries for mobile, tablet and desktop platforms.

Infosys, Technology Analyst, India (March 2022-October 2023)
- Experienced in web development projects such as NBB and UNI Bank, with a focus on developing location services, UPI payment systems, and FastTag modules following SDLC standards.
- Proficient in UI development and adept at resolving real-time issues. Skilled in conducting unit tests and implementing CI/CD pipelines.
- Proficient in Testing, Angular, Less, Arcos, SVN, Scrum, NPM, AWS, JSON, SQL, DOM, and React.
- Implemented RESTful APis, enhancing application connectivity and data exchange with third-party services.

TataConsultancyServices, System Engineer, India (January 2020- March 2022)
- Implemented features such as Sovereign Gold Bonds, Recharge module,

and App Permission functionalities meeting project deadlines.

- Contributed to projects for prominent clients such as ICICI Bank and Panasonic for web and mobile platforms.
- Proficient in Angular, Bootstrap, and jQuery, with experience in mobile applications development using Ionic Framework. Skilled in Agile Methodology, Jira, and debugging.
- Utilized version control systems such as Git and GitHub for collaborative development.
- Managed a small subset of team to deliver multiple modules of application and achieved the target timeline.

The CapitalNet, Software Engineer, India (August 2018 – November 2019)
- Developed major applications such as Bizzplanner and InvestorNet, where I specialized in Frontend and Backend technologies
- Demonstrated proficiency in developing APIs for a delivery-oriented web application utilizing Html, CSS, JavaScript, MongoDB, Git, Angular, and REST API.
- Optimized application performance through code refactoring and focusing mainly on product quality and enhancing user experience.

Skills

- **Programming Languages:** Html, CSS, JavaScript, jQuery, Bootstrap,graphQL, NodeJS, Ionic Framework, Angular, Typescript, SQL, DOM, React, AWS,Cypress
- **Database:** MongoDB;OS-Linux ;Tools- Google Analytics
- **Versioning Tools:** Git, GitHub, SVN
- **Methodologies:** Agile
- **IDE:** VS Code
- **Languages:** English, Norwegian

Accomplishments

- Received an on-the-spot award at TCS twice.
- Achieved certification in Digital Interactions Professional Skills at Infosys.
- Received recognition from the CEO of CapitalNET for contributions to the development of the Bizzplanner application.

Education
Bachelor's in computer science engineering
G.PullaReddy Engineering College, India (June 2014-April 2018)
